

OUEDRAOGO Sayouba

Network and Systems Infrastructure Engineering

+212 6 23 11 30 83 | sayouba.ouedraogo.pro@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Engineering student in Network Engineering and Information Systems with hands-on experience in network design, infrastructure deployment, systems administration and cybersecurity. Solid foundation in TCP/IP protocols, Cisco configuration, Linux server hardening and network simulation (Cisco Packet Tracer, OMNeT++, Wireshark). Active CTF competitor with multiple top rankings in national cybersecurity challenges, combining technical rigor with a problem-solving mindset.

TECHNICAL SKILLS

Networking	TCP/IP, Subnetting, VLANs, Routing (OSPF, RIP), Switching, Spanning Tree
Network Tools	Cisco Packet Tracer, OMNeT++, Wireshark, Nmap
Security	Firewall config (Fortinet), IDS/IPS basics, vulnerability assessment, CTF techniques
Systems Admin	Linux (Debian/Ubuntu), Windows Server 2019, Active Directory basics
Scripting / Dev	Python (automation), Bash, Java, Git/GitHub
Virtualisation	VirtualBox, VMware basics, Docker basics

PROJECTS

Enterprise Network Design & Simulation

Designed and simulated a multi-site enterprise network with VLAN segmentation, inter-VLAN routing, OSPF dynamic routing and redundancy mechanisms. Analyzed packet behavior and link performance under varying traffic loads.

Cisco Packet Tracer · OMNeT++ · TCP/IP · OSPF · STP

Role: Full design — topology planning, IP addressing scheme, routing configuration and performance analysis.

Secure Infrastructure Lab — Windows Server 2019

Set up a small enterprise infrastructure with Active Directory, DNS and DHCP services. Configured user roles, GPO-based access control policies and mapped shared network resources with permission tiers.

Windows Server 2019 · Active Directory · DNS · DHCP · GPO

Role: Solo lab — domain controller setup, user and group policy management, service configuration.

Network Monitoring & Traffic Analysis

Deployed a network monitoring environment to capture and analyze live traffic, identify anomalies and interpret protocol-level behavior. Studied ARP, ICMP, TCP handshake and common attack signatures.

Wireshark · Nmap · Linux · Bash

Role: Full setup — packet capture, filter scripting and protocol analysis report.

Linux Server Hardening & Service Deployment

Configured and hardened a Linux server: SSH key-based authentication, UFW firewall rules, fail2ban, automated log monitoring and deployment of web and FTP services.

Linux (Debian) · Bash · UFW · fail2ban · Apache · vsftpd

Role: Solo project — system hardening, service deployment and automated monitoring scripts.

Home Automation Network (IoT Simulation)

Simulated a smart home network integrating IoT devices with a central gateway, applying QoS policies, NAT and access control lists to manage device traffic and ensure network security.

Cisco Packet Tracer · IoT module · ACL · NAT · QoS

Role: Full design — device topology, traffic prioritisation rules and security policy configuration.

EDUCATION

2024 – Present	Engineering Degree – Networks & Information Systems · FST Marrakech
2022 – 2024	Diploma of Studies in Sciences and Techniques · FST Settat
2019 – 2022	Technical Baccalaureate (Mathematics, Physical Sciences) · LSN, Bobo Dioulasso

HACKATHONS & COMPETITIONS

HackShield — SecDojo & AXA GBS	Top 10 / 200 teams — securing simulated IT infrastructures
AUSIM CyberDrill — East Region V2	Top 20 / 50 teams — CVE exploitation & RCE, 18h
GCDxJIT CTF	Top 5 / 30 teams — Forensics, DFIR, PWN, 15h
CyberOdyssey CTF — SecDojo	57 th / 414 teams — 24h cybersecurity competition
GCDxN7 CTF — Code 212 Marrakech	15 th / 40 teams — network security & traffic analysis
Orange Digital Center Champions 2025	Top 5 / 50 national — algorithmic programming

CERTIFICATIONS & LANGUAGES

Cisco: Networking Basics · Equipment & Basic Configuration · Network Administration & Troubleshooting · Linux & Windows OS Basics

Fortinet: FCF – Introduction to Cybersecurity · Technical Introduction to Cybersecurity · Threat Landscape

Languages: French (C1 – Fluent) | English (B1 – Intermediate)
