

Ouedraogo Sayouba

Engineering Student – Mobile & Web Development · Applied AI

+212 6 23 11 30 83 | sayouba.ouedraogo.pro@gmail.com | LinkedIn | GitHub | Portfolio

Seeking a 6-month final-year internship (PFE) — February to July 2027 | Morocco · Remote / Hybrid

PROFILE

Final-year engineering student in Networks & Information Systems, specialising in **mobile and web development** and **applied AI**. Three internships shipping production software: a Flutter app in service at a national helpline, a Spring Boot decision-support platform and an interactive data-visualisation system. End to end: Flutter and React on the front, FastAPI and Spring Boot on the back, PyTorch and LangChain / RAG for AI. First place in a national AI hackathon.

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Aug 2026 – Present · On-site

École Centrale Casablanca

- Built an interactive visualisation and decision-support platform for the surveillance and control of respiratory infectious diseases in Morocco, including the epidemiological dashboards and the data pipeline feeding them.

Data visualisation · Interactive dashboards · Decision-support systems

Full-Stack Development Intern

Jul 2026 · On-site · Casablanca

Spheralis — e-supply chain

- Delivered a PostgreSQL decision-support application (11 tables, 8 analytical views, live data on Aiven) exposed through a Spring Boot REST API.
- Built a real-time Metabase KPI dashboard and a WhatsApp AI agent automating supplier order confirmation.

Spring Boot · Java · PostgreSQL · Metabase · WhatsApp Business API · REST

Mobile Development Intern

Jul 2025 – Aug 2025 · Hybrid

CMRPI — Espace Maroc Cyberconfiance (EMC Helpline)

- Designed and developed a Flutter mobile application allowing children victims of cyberviolence to report incidents to the EMC Helpline; built the Firebase backend (Firestore, authentication, security rules) and the full Figma user journey.

Flutter · Dart · Firebase (Firestore, Auth) · Figma · UX for vulnerable users

TECHNICAL SKILLS

Languages

Python, Java, JavaScript / TypeScript, Dart, PHP, SQL

Mobile

Flutter / Dart, React Native, Firebase (Firestore, Auth, FCM)

Web / Frontend

React, TypeScript, Tailwind CSS, Vite, HTML5 / CSS3

Backend / APIs

FastAPI, Spring Boot, RESTful APIs, WebSocket, unit testing

AI / LLM

PyTorch, Deep Learning, Computer Vision, LangChain, RAG, ChromaDB, OpenAI API

Data / Tools

PostgreSQL, MySQL, Firestore, Docker, Git, CI/CD, Agile, Figma, Metabase

PROJECTS

Smart Recruit (Hackathon Ramadan IA — 1st Place) — AI recruitment microservices platform: CV parsing, candidate-offer compatibility scoring and real-time audio interviews (Whisper transcription, LLM evaluation).

FastAPI · React · TypeScript · MySQL · OpenAI · WebSocket · Docker | **Role:** Backend lead — microservice architecture, OpenAI integration and scoring engine.

Smart Attend — Facial-recognition attendance system with real-time notifications, history dashboards and a React Native companion app for on-the-spot check-in.

Spring Boot · FastAPI · React · React Native · PostgreSQL · InsightFace · Docker | **Role:** Full-stack — backend API, recognition pipeline and real-time WebSocket events.

AI RAG Agent — RAG application to query documents (PDF, Word, CSV) in natural language, with sourced answers, history and streaming responses.

FastAPI · React · LangChain · ChromaDB · OpenAI GPT-4o | **Role:** Personal project — design from document ingestion to streaming chat interface.

EDUCATION

2024 – Present **Engineering Degree — Networks & Information Systems** · FST Marrakech (UCA)

2022 – 2024 Diploma of Studies in Sciences and Techniques (DEUST) · FST Settat

DISTINCTIONS & CERTIFICATIONS

Hackathon Ramadan IA — 1st Place | **Orange Digital Center Champions 2025** — Top 5 / 50 national | **HackShield** (SecDojo & AXA GBS) — Top 10 / 200

Certifications: Machine Learning Specialization (DeepLearning.AI / Stanford) · Cisco Networking Basics · Cisco Network Administration | **Languages:** French (C1) · English (B1)
