

Ouedraogo Sayouba

Engineering Student – Networks, Infrastructure & IT Security

+212 6 23 11 30 83 | sayouba.ouedraogo.pro@gmail.com | LinkedIn | GitHub | Portfolio

Seeking a 6-month final-year internship (PFE) — February to July 2027 | Morocco · Remote / Hybrid

PROFILE

Final-year engineering student in Networks & Information Systems, focused on **network engineering, infrastructure and cybersecurity**. Solid grounding in TCP/IP, Cisco configuration, Linux hardening and network simulation (Packet Tracer, OMNeT++, Wireshark), backed by three internships deploying and securing real systems — cloud databases, deployed services and an app handling sensitive minors' data. Active CTF competitor with several national top rankings.

PROFESSIONAL EXPERIENCE

Software & Infrastructure Intern

Aug 2026 – Present · On-site

École Centrale Casablanca

- Deployed and operated the services of a decision-support platform for respiratory disease surveillance in Morocco; designed the data pipeline feeding its epidemiological dashboards.

Linux · Service deployment · Data pipelines · Monitoring

Backend & Data Infrastructure Intern

Jul 2026 · On-site · Casablanca

Spheralis — e-supply chain

- Provisioned and administered a managed PostgreSQL instance on Aiven cloud (11 tables, 8 analytical views), exposed through a Spring Boot REST API.
- Integrated the WhatsApp Business API with token-based authentication, and set up a real-time Metabase monitoring dashboard.

PostgreSQL · Aiven Cloud · Spring Boot · REST · API authentication · Metabase

Mobile Development Intern

Jul 2025 – Aug 2025 · Hybrid

CMRPI — Espace Maroc Cyberconfiance (EMC Helpline)

- Built the Firebase backend of a reporting app for children victims of cyberviolence: authentication, Firestore security rules and access-control tiers on sensitive data.

Firebase Auth · Firestore security rules · Access control · Data confidentiality · Flutter

TECHNICAL SKILLS

Networking

TCP/IP, subnetting, VLANs, inter-VLAN routing, OSPF, switching, STP, NAT, ACL, QoS

Tools

Cisco Packet Tracer, OMNeT++, Wireshark, Nmap

Security

Firewalls (Fortinet, UFW), IDS/IPS basics, fail2ban, vulnerability assessment, CTF (forensics, DFIR, PWN)

Systems Admin

Linux (Debian / Ubuntu), Windows Server 2019, Active Directory, DNS, DHCP, GPO, SSH

Cloud / Virt.

Docker, VirtualBox, VMware, managed cloud databases (Aiven), Firebase

Scripting

Python (automation), Bash, Java, SQL, Git & GitHub

PROJECTS

Enterprise Network Design & Simulation — Multi-site network designed and simulated end to end — topology, IP addressing plan, VLAN segmentation, inter-VLAN routing, OSPF and redundancy; packet behaviour and link performance analysed under load.

Cisco Packet Tracer · OMNeT++ · TCP/IP · OSPF · STP

Secure Infrastructure Lab — Windows Server 2019 — Solo lab: domain controller setup with Active Directory, DNS and DHCP; user roles, GPO access-control policies and permission-tiered shared resources.

Windows Server 2019 · Active Directory · DNS · DHCP · GPO

Linux Server Hardening & Service Deployment — Solo project: SSH key authentication, UFW rules, fail2ban, automated log-monitoring scripts, web and FTP service deployment.

Linux (Debian) · Bash · UFW · fail2ban · Apache · vsftpd

EDUCATION

2024 – Present **Engineering Degree — Networks & Information Systems** · FST Marrakech (UCA)

2022 – 2024 Diploma of Studies in Sciences and Techniques (DEUST) · FST Settat

COMPETITIONS, CERTIFICATIONS & LANGUAGES

HackShield (SecDojo & AXA GBS) — Top 10 / 200 teams, securing simulated IT infrastructures | **AUSIM CyberDrill** East Region V2 — Top 20 / 50, CVE exploitation & RCE | **GCDxJIT CTF** — Top 5 / 30, forensics / DFIR / PWN | **GCDxN7 CTF** (Code 212 Marrakech) — 15th / 40, network security & traffic analysis

Cisco: Networking Basics · Equipment & Configuration · Network Administration & Troubleshooting · Linux & Windows OS Basics | **Fortinet:** FCF Cybersecurity · Threat Landscape | **Languages:** French (C1), English (B1)
